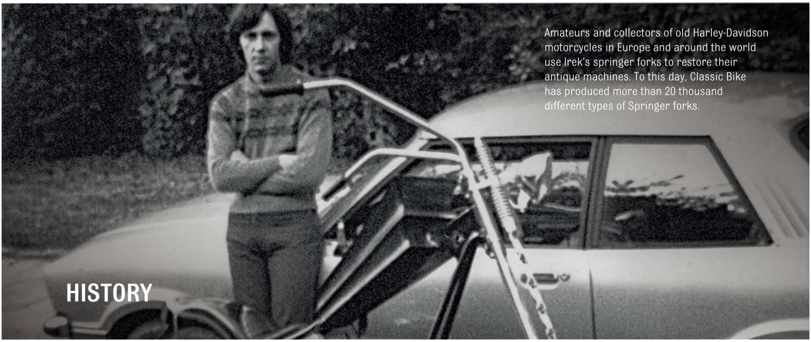
ABOUT US



Amateurs and collectors of old Harley-Davidson motorcycles in Europe and around the world use Irek's springer forks to restore their antique machines. To this day, Classic Bike has produced more than 20 thousand different types of Springer forks.

HISTORY

Classic Bike's history begins on July 17, 1972, when 20-year-old Irek Pyra buys his first Harley-Davidson WLA1942 motorcycle. Irek opened his first garage in 1979, where he began to produce spare parts for Harley-Davidson military motorcycles. In the early 90's, the company produced first Springer forks for the WLA model. Thanks to modern technology, excellent materials, and Irek's belief that only products that match the quality of original Harley-Davidson parts are worthy of carrying the Classic Bike brand, our springer forks have dominated the European market.

COMPANY

The family-owned company Classic Bike was founded in Poland in 1983. We specialize in manufacturing motorcycle parts that require a unique knowledge of metallurgical processes, precision and quality. The current assortment includes more than 50 models of springer forks and spare parts for Harley-Davidson antique motorcycles, modern Softail and customs.

ABOUT US

PRODUCTION

Classic Bike was created by bikers and manufactures parts for bikers who ride their vintage bikes.

Classic Bike springer forks can be easily recognized by the following details:

- Brass soldered connectors (not electrically welded)
- Metal parts are forged and not cast
- Perfect profiles of forks, brake shackle brackets, fender brackets
- Forged factory numbers
- Classic Bike logo and serial number etched on the product

All Classic Bike products are manufactured in Poland and made of the finest certified materials on state-of-the-art machines as well as tools similar to those used by the Motor Company.
